

Board, students disagree on foreign student fee differential

The University's Board of Governors agrees with the provincial government that the foreign student fee differential of 1.5 times the applicable tuition fees for domestic students is reasonable and likely lower than in many provinces.

In its response to Alberta Advanced Education's "Tuition Fee Policy Review: A Discussion Paper," the Board acknowledged that the GFC international student

fee policy of 1986 had as an objective working towards the abolition of differential fees for international students. "While the Board once endorsed this objective, it no longer does so," Governors agreed 27 July.

Student representatives, however, maintain that that objective is a worthy one and continues to command the support of the Students' Union (SU) and

Graduate Students' Association (GSA).

The financial plight of the University and the fact that differential fee revenues could not easily be replaced has not escaped students' attention. "However, we stand opposed in principle to the differential fee. We feel that the current University policy to work towards the abolition of differential fees should still be viewed as a

long-term goal of this institution," say Mark Salik, International Students' Organization; Martine Lunke, President of the International Students' Organization; Stephen Downes, GSA President; and Suresh Mustapha, SU President.

"This is indeed a difficult issue and involves balancing fairness to the taxpayers of Alberta and the financial difficulties of foreign students," President Paul Davenport outlined for the Board. In response to concerns raised by Wilf Allan, then Director of the International Centre, President Davenport pointed out, "I must note that while it is true that there are waivers in Ontario and Quebec, the foreign student fees paid in those provinces are some three times those paid in Alberta."

Allan's concerns were threefold: unlike many Canadian students, foreign students do not have other income to support themselves or their families; the U of A has one of the poorest mixes of foreign students in Canada, partly due to the fact that Alberta is the only province that does not have exemptions to the fee; and the differential fees constitute a form of discrimination based on nationality.

The Board, in its response to the policy initiative from Advanced Education, asked the government to consider a policy to allow universities to grant tuition fee waivers for certain numbers of outstanding foreign students, particularly graduate students. And the Board urged the government to assist in removing barriers to students and their spouses seeking temporary employment while in Canada. □

FOLIO

University of Alberta

9 August 1990

Folio adopts a tried and true format

Effective with the next issue (23 August), *Folio* becomes a member in good standing of the tabloid club.

A tabloid is a newspaper with pages measuring 11 1/2 inches by 17 inches—that is, half the size of the *Edmonton Journal* or the *Globe and Mail*. The *University of Toronto Bulletin*, the *McGill Reporter*, *Western News* and virtually all newspapers serving a Canadian university campus use the smaller format, so *Folio* will be in good company.

The reason for the change is hardly an unusual one. Production costs had risen to the point where it became necessary to either reduce *Folio's* news coverage or have the paper printed tabloid size on (recyclable) newsprint. By opting for the second course of action, the Office of Public Affairs will save at least \$20,000 a year. That benefit aside, the five-column format provides greater layout flexibility. And, with markedly larger headlines, text, photographs and illustrations, *Folio* will have a more dynamic look to it.

The vast majority of the issues will be eight pages, with summer and year-end issues consisting of four pages. *Folio's* long-standing deadlines will remain unchanged. □

Sir Frederick Haultain Prize awarded to Donald Robinson

One of the country's preeminent chemical engineers has been awarded the 1990 Sir Frederick Haultain Prize for his accomplishments in the sciences.

Professor Emeritus Donald Robinson served as Head of the University of Alberta's Department of Chemical and Petroleum Engineering from 1959 to 1970 and retired in 1984. He was considered an outstanding teacher by his students because he had the ability to explain highly technical material in an understandable way.

Dr Robinson's particular area of expertise was the application of thermodynamics to natural resources. Working in conjunction with his contacts in the Canadian Gas Processors Association, Dr Robinson sought innovative ways of solving problems the petroleum industry was having with the production of oil and

natural gas.

The chemical engineer's ideas were often transferred to the field; he established his own company to provide specialized scientific equipment worldwide.

Dr Robinson, who received his PhD from the University of Michigan, is also known internationally for his contributions to the development of a unique mathematical equation for the representation of pressure, volume and temperature behavior of pure substances and of mixtures used in the oil and gas industry.

The \$25,000 Haultain Prize is one of 10 programs administered through the Alberta Heritage Scholarship Fund established by the provincial government with a \$100 million endowment from the Alberta Heritage Savings Trust Fund. □

Stinson says awards she's received result from working with good people

The Faculty of Nursing's Shirley Stinson has had praise and recognition over the years. But during the last month, her peers from across the country have decided she deserved more.

At the recent Canadian Nurses Association (CNA) annual meeting in Calgary, she received the highest nursing award in the country, the Jeanne Mance Award, and the Canadian Nurses Foundation Ross Award for Nursing Leadership. Then, on 18 July, the provincial government awarded her a \$25,000 Sir Frederick Haultain Prize in the Humanities category.

Professor Stinson, who has a joint appointment in the Faculty of Nursing and the Faculty of Medicine's Department of Health

Services Administration and Community Medicine, and is an adjunct professor in the University of Calgary's Faculty of Nursing, says she's deeply honored by the recognition.

A graduate (BScN) of this University and of the University of Minnesota (MNA in Nursing Service Administration), and the first Alberta nurse to obtain a doctoral degree (EdD, Columbia, 1969), Professor Stinson points out that she has had the privilege of working with good people. "These awards are really the result of joint efforts and, essentially, the accomplishments I've had over the years are the result of these joint efforts."

In memoriam: Ruth Ann Pitts-Murray

The staff of Faculté Saint-Jean deeply regret the untimely early death of their colleague who had been associate professor of sociology since 1976.

She will be missed by all who knew her. We wish to extend our deepest sympathy to her husband, Ken Murray, of Edmonton, and to her family in Denver. □

John Schlosser hefts a carved musk-ox that was presented to him on the occasion of his last meeting as Chair of the Board of Governors. Dr Schlosser said government must decide whether to appoint the new Chair from within the Board or go outside. Traditionally, such appointments have been made internally, he said.

President praises Schlosser's leadership

Among the kind words extended to John Schlosser as he concluded his tenure as Chair of the Board of Governors were those of President Paul Davenport.

"An outstanding citizen of the University of Alberta," is how the President defined Dr Schlosser, a member of the Board for 18 years, the last 12 as Chair.

"John directed the sale of part of the University Farm in the 1970s, a project that led directly to our Endowment Fund for the Future, which has been so important in strengthening excellence at the University, through the Distinguished Visitors Program, the Tory Chairs, and other academic initiatives. He has also been very active in promoting technology transfer between the University and industry, and in the creation of many of our spinoff companies, including Chembiomed.

"Ever since the 1970s, John has been a strong advocate of three- to five-year plans for government funding. He has diligently worked toward better internal financial planning and management. Thanks to Dr Schlosser's foresight, our endowments are among the best managed in the country. This is extremely important both for our own long-term financial health and for major donors who are very interested in how we manage their gifts.

"John has also been very active in reaching out to the community around us; he instituted regular meetings with the Chamber of Commerce and the Edmonton Caucus, and three annual gatherings of the Chairs of the Boards representing universities in Canada, in the West, and in Alberta."

In acknowledging a debt of gratitude to Dr Schlosser, the President said this has not been an easy year at the U of A. "We have

Nursing, Pharmacy grant special admission for aboriginal students

The Board of Governors has approved proposals from the Faculties of Nursing and Pharmacy and Pharmaceutical Sciences for special admission of aboriginal applicants.

In addition to regular quota positions in the Faculty of Nursing, up to four positions per year will be available in the basic four-year BScN program for qualified students of aboriginal ancestry.

In the Faculty of Pharmacy and Pharmaceutical Sciences, in addition to the regular quota positions, up to one additional position per year will be available in the BSc Pharmacy program for a qualified student of aboriginal ancestry.

Special admission provisions

already exist in a number of quota Faculties, for example, Education, Law, and Medicine. The Nursing and Pharmacy and Pharmaceutical Sciences proposals were endorsed by the GFC Committee on Admissions and Transfer and the Academic Development and Planning and Priorities Committees.

Students who identify themselves as aboriginal and who meet the minimum admission requirements of the Faculty will be considered outside the competitive applicant pool.

Although the exact number of aboriginal nurses and pharmacists in the country is not known, indigenous representation in the health care field is

disproportionately low. At the same time, growing numbers of bands across the country are assuming health care responsibilities.

Native Student Services Director Reinhild Boehm applauded the University for the decision to approve the quota positions, saying the move was consistent with a native students policy which calls for the creation of quota positions in all Faculties.

The argument that the quotas will lower University standards has no foundation because the aboriginal students must have the same prerequisites and meet the same standards as other students, Dr Boehm commented.

"These quotas say to native students 'there will be places for you and we're willing to go out of our way to place you,'" she said, adding that "I'd be thrilled if business followed suit." □

Board briefs

- The University has itself an Environmental Research and Studies Centre. A great deal of environmental research and instruction is already being carried out in a number of departments and units but, with virtually none of it being terribly well known, major funding opportunities have often gone begging. Board approval means the centre can request University funding and use the University's name in fundraising drives.
- The appointment of Glen Mumey as Chair of the Department of Finance and Management Science was announced by the Board Educational Affairs Committee. His term is for five years, beginning

1 July 1990. Dr Mumey has been on campus since 1970; for the past four years he has been an adjunct professor of agricultural economics. His research interests include risk in Alberta crop revenues and development of an agricultural finance data base. Dr Mumey served as Chair of Finance and Management Science from 1976 to 1979.

- A "very intensive search" is under way for candidates for the position of Vice-President (Finance and Administration). President Davenport expressed hope that the evaluation of these individuals would take place in late November.
- The Faculty of Extension building being erected at 83 Avenue and

112 Street will be known as "The University of Alberta Extension Centre."

- A steam-turbo generator is being considered for the Heating Plant. The addition, the Board was told, would result in more efficient use of steam in the heating system and a reduction in power costs. Also, the back-up generating capacity would be particularly welcome during the winter months.

There are two phases to the project: design and planning, for which the Governors approved up to \$254,000, and the purchase, installation and commissioning of the new equipment. The price tag for the total project could be as high as \$5 million. □

Stinson *Continued from page two*

According to CNA President Judith Ritchie, Dr Stinson is "highly recognized for her determined efforts to promote Canadian nursing research at a time when interest and resources were minimal. There is no doubt that her contributions in these areas have greatly strengthened Canadian nursing and enhanced public recognition of nurses' achievements."

"Considerable progress has been made in nursing education in Alberta and Canada, particularly in the development of Master's in Nursing programs—and more recently in the collaborative nursing education arrangements among hospitals, community colleges and universities," says Dr Stinson, a long-time advocate of nursing education.

But, Dr Stinson, who in 1978 was the project director for the seminal Kellogg National Seminar on Doctoral Preparation for Canadian Nurses, says much remains to be done. "Even though Canadian nurses have been trying to get PhD in Nursing programs established in Canada since 1978, no such program has yet been established." (A University of Toronto program is soon to be initiated and McGill University and the University of Montreal are now developing a joint program.)

A joint U of A/U of C Faculties of Nursing PhD in Nursing proposal in 1986 received approval from the U of A Board of Governors, subject to appropriate funding, but that funding has not materialized. "I'm hoping that the provincial government will see fit to make it one of their key funding priorities, not only from the standpoint of professional education, but from that of improvements in health care and the development of nursing research in Alberta."

Dr Stinson, the first nurse ever to receive a Senior National Health Research Scientist Award from the Canadian National Health Research and Development Program, and the first Chair of the Alberta Foundation for Nursing Research, points out that of the approximately 235,000 registered nurses in the country, only about 200 have doctorates. Fewer than 50 of those have doctoral preparation in nursing.

"There's an extreme shortage of nurses who are adequately prepared to advance nursing knowledge and carry out research on clinical nursing practice," says

Dr Stinson, who is now a coinvestigator on a CNA-sponsored national survey of Canadian nurses with doctoral degrees.

The former CNA president (1980-82) and former Associate Director of Nursing at Toronto's Hospital for Sick Children says her future includes the continuing challenge of establishing a PhD in Nursing program at the U of A. "I'm also interested in ensuring that more attention is given to the history of nursing," she says, adding that she plans to continue writing on those topics.

Moreover, Dr Stinson views the recent establishment of the Institute for Philosophical Nursing Research as an encouraging step and she hopes to continue seeking long-term funding for the Institute. She says the \$50,000 interim support recently provided by the Winspear Foundation is immensely helpful.

Dr Stinson, who grew up in Tofield, Alberta, says she and her brother and sister have been very fortunate in that their parents encouraged them to pursue activities that interested them the most. "And they made it possible for us to get at least the first year

of university," she says.

Her unceasing teaching and research activities haven't been conducted without certain costs. "But all in all I feel I have had the good fortune to be involved in endeavors that are very interesting, worthwhile and challenging." □

President's Advisory Committee on Sexual Harassment

The President's Advisory Committee on Sexual Harassment (PACSH) has a vacancy for one female member of the nonacademic staff. The candidate will serve as a member of PACSH for a two-year term of office—1 July 1990 to 30 June 1992.

If you are interested in serving on this committee or if you would like to submit a nomination, please send a brief résumé and covering letter to: Ellen Schoeck Solomon, Coordinator of PACSH, 2-1 University Hall.

GSA launches court action against fee increases

The Graduate Students' Association has decided to launch a court action against the University as a result of graduate student fee increases approved by the Board of Governors 27 July.

The GSA council voted to hire the legal firm Milner and Steer and to spend approximately \$10,000 on the action.

"The law says that Advanced Education Minister John Gogo sets limits to fee increases and he set that limit at 15 percent," says GSA President Stephen Downes. "We will be asking the court to enforce that law."

"There is strong support for this action from graduate students across campus," Downes says, contending that the increase amounts to a 378 percent increase and an \$860,000 cash grab by the University.

"In our opinion, it's an illegal cash grab and we are determined to put an end to it. The University may have thought that graduate students have neither the will nor the resources to enforce the law. If so, they were wrong."

Acting Vice-President (Academic) Brian Evans said the University has been advised by Alberta Advanced Education that the two fees in dispute are not seen as fees for instruction under *The Universities Act*. "Therefore, they are a charge that the University Board of Governors has full control over,"

Dr Evans said last week. "The University view is that these are not regular instructional fees and therefore are not subject to the 15 percent rule."

The Board agreed to increase three graduate students fees: the full registration fee, the post-program fee (minimum instruction fee) and the continuing registration fee. The post-program fee is the fee students pay once they have completed their formal program, following their course work, while they're continuing to do research and completing their thesis work. The continuing registration fee is used to maintain registration for graduate students who do not want to register in course work, projects or thesis work. Both fees were previously set at \$52 a term and both were raised to \$249 per term. The Board also agreed to increase full registration fees per term to \$747.50 from \$650.

"I sometimes think that people may have been getting the impression that these fees are in addition to their normal full fees," Dr Evans said.

Downes said the University must argue that the minimum instruction fee is not a fee for instruction and is therefore exempt from the Minister's order.

Students' Union President Suresh Mustapha said in principle he agreed with the GSA initiative. "I wish them luck," he said, but

added that a recent SU court challenge related to the validity of additional library and computing fees was unsuccessful.

On the issue of undergraduate fees, Mustapha said this year's increases would be uncomfortable yet manageable. If, however, fees continue to rise over the next four years, it is going to be increasingly difficult for undergraduates to manage on finite resources, he said.

Mustapha said he wasn't comfortable with the tendency to look at student fees as a percentage of the annual operating budget. "We should be looking at the students' ability to pay," he said. He added that students are paying more for an education which is continuing to deteriorate.

Dr Evans said the former graduate student fee of \$52 a term is a very modest rate, even just to process the paperwork for maintaining a student's registration. "The University of Alberta has been low in its fee structure in relation to other institutions. The \$52 just wasn't realistic and the increase to \$249 was designed to be a little more realistic to meet the needs of the University and to maintain these programs." He added that one of the effects of the fee increases might be to encourage students to finish their programs faster. □

Schlosser

Continued from page three
had to make tough choices that disappointed many in our community, and outraged some. I think of the cancellation of the Collections Centre, the stringency tax, the cap on enrollments. Rather than hiding from the resulting criticism, as he might well have done, John has stepped forward each time to support the decisions, and to share the resulting heat with me. He has been an ideal chairman: concerned to get involved in the setting of the overall direction of the University, but leaving the nuts and bolts of policy to the administration; someone always ready to give me advice and guidance, but someone I could count on when the chips were down."□

Award opportunities

Muttart Diabetes Research and Training Centre

The Muttart Diabetes Research and Training Centre was formed in June 1981 at the University of Alberta, through an endowment by the Gladys and Merrill Muttart Foundation.

The objectives of the Centre are: to provide core laboratory facilities for the Centre's investigators; to provide start-up funding for pilot research projects; to train investigators interested in diabetes-related research; and to encourage interaction between investigators of the various disciplines and health professionals involved in diabetes research and the care of diabetic patients.

In keeping with these objectives, the Centre is now accepting diabetes-related pilot project proposals. Eligibility includes membership in the Muttart Diabetes Research and Training Centre. The deadline for submissions is 15 October 1990.

Further details and application forms may be obtained by contacting: Mrs Brenda Bohne, Administrative Assistant, 458 Heritage Medical Research Centre CW, University of Alberta, Edmonton, Alberta T6G 2S2. Telephone 492-6855.

Positions

The University of Alberta is committed to the principle of equity in employment. The University encourages applications from

aboriginal persons, disabled persons, members of visible minorities and women.

Academic

Manager, Internal Audit

Rank and salary: This Administrative Professional Officer position, with 700 Hay points and a salary range of \$40,602 to \$60,906, reports to the Associate Vice-President and Comptroller.

Position description: The Manager is responsible for the development and implementation of the department's annual audit plan for the University's academic and service functions, in which internal controls, compliance with established policies and the reliability of management information are evaluated and recommendations for improvements are offered. The Manager is expected to perform operational and financial audits in addition to supervising a professional audit staff in a computerized environment. This position has a staff of three reporting to it.

Qualifications: Applicants must possess a university degree and an accounting designation and five years' experience in public accounting or equivalent internal audit experience. Applicants must have good administrative abilities and effective communication skills. The incumbent must be able to exercise tact and diplomacy in dealing with auditees. The incumbent will serve on the University's Board Audit Committee.

Applications: Applications should be forwarded to: Louis F Janernik, Associate Vice-President and Comptroller, 347 Administration Building, University of Alberta, Edmonton, Alberta T6G 2M7. Deadline for receipt of applications is 20 August 1990.

Support Staff

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 492-5201. Due to publication lead time and the fact that positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 3 August. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSR.

Positions available as of 3 August 1990.

The salary rates for the following positions reflect adjustments in accordance with the terms for the implementation of the Pay Equity Program.

Clerk Typist (Mail Clerk), Grade 3 (Term to 1 August 1991), Faculty of Graduate Studies and Research, (\$1,497-\$1,844)
Clerk Typist, Grade 4, Faculty of Extension, (\$1,633-\$2,013)
Clerk Typist, Grade 4, Provincial Lab, Edmonton, (\$1,633-\$2,013)
Clerk Steno, Grade 4, Educational Administration, (\$1,633-\$2,013)
Clerk Steno, Grade 5, Romance Languages, (\$1,784-\$2,210)
Accounts Clerk, Grade 5 (Term to 31 March 1991), Career and Placement Services, (\$1,784-\$2,210)
Student Records Processing Clerk, Grade 5, Faculty of Extension, (\$1,784-\$2,210)
Accounts Clerk (Part-time) Grade 6, Home Economics, (\$1,171-\$1,450) (prorated)
Administrative Clerk, Grade 6, Art and Design, (\$1,952-\$2,433)
Administrative Clerk, Grade 6, Personnel Services and Staff Relations, (\$1,952-\$2,433)

Administrative Clerk, Grade 6 (Timetabling Assistant), Office of the Registrar, (\$1,952-\$2,433)
Departmental/Executive Secretary, Grade 6, Office of the Dean of Dentistry, (\$1,952-\$2,433)
Departmental/Executive Secretary, Grade 6, Drama, (\$1,952-\$2,433)
Departmental/Executive Secretary, Grade 6, Museums and Collections Services, (\$1,952-\$2,433)
Library Assistant, Grade 7, Library, (\$2,125-\$2,663)
Animal Assistant, Grade 2, Health Sciences Laboratory Animal Services, (\$1,363-\$1,680)
Public Relations/Publications Assistant, Grade 6, Sociology, (\$1,952-\$2,433)
Technician, Grade 6, University Computing Systems, (\$1,952-\$2,433)
Security Officer, Grade 7 (40 hour week), Campus Security, (\$1,853-\$2,385)
Administrative Assistant, Grade 7, University Secretariat, (\$2,125-\$2,663)
Technician, Grade 7 (Part-time) Oral Biology, (\$1,063-\$1,332), (prorated)
Accounting Assistant, Grade 8, Office of the Comptroller, (\$2,296-\$2,895)
Programmer Analyst, Grade 9, University Computing Systems, (\$2,484-\$3,152)
Administrative Assistant, Grade 9 (Housing and Residence Life Coordinator), Housing and Food Services, (\$2,484-\$3,152)
Art Technician Demonstrator, Grade 10, Drama, (\$2,675-\$3,413)
Laboratory Technologist, Grade 10, Provincial Laboratory, (\$2,675-\$3,413)
Dental Technician, Grade 11, Restorative Dentistry, (\$2,867-\$3,679)

The following positions retain salary rates in accordance with the previous classification system and pay plan.

Clerk Typist III (Term to 31 January 1991), Materials Management (Purchasing), (\$1,505-\$1,890)
Clerk Steno III (Trust), Faculty of Medicine, (\$1,505-\$1,890)
Library Assistant I (Trust/term to 30 June 1991), Legal Resource Centre, (\$1,556)
Secretary (Trust/term to 28 February 1991), Faculty of Nursing, (\$1,677-\$2,143)
Medical Steno (Trust), Medicine (Cardiology), (\$1,677-\$2,143)
Laboratory Assistant (Part-time/hourly/trust), Physiology, (\$6.70/hour)
Technician I/II (Part-time/trust/term to 1 July 1992), Pharmacology, (\$869-\$1,269) (prorated)
Biology Technician I (Trust), Genetics, (\$1,738-\$2,234)
Biochemistry Technician I/II (Trust), Biochemistry, (\$1,738-\$2,537)
Biology Technician II/Technologist I (Trust), Genetics, (\$1,973-\$2,768)
Technician II/Technologist I (Trust), Biochemistry, (\$1,973-\$2,765)
Technologist I (Trust), Oral Biology, (\$2,143-\$2,765)
Biochemistry Technologist I (Trust), Pharmacology, (\$2,143-\$2,765)

We need your response to the concept of

**A 'CONSERVER SOCIETY' PROJECT on the
University of Alberta campus**

Twenty years ago, members of the University community were the first and only source of local pollution information to Edmontonians. Their work and dedication eventually played a significant role in the creation of Canada's first governmental environment department in Alberta.

Today all Albertans are faced with confusing and alarming environmental issues... and once again the University of Alberta has an opportunity to offer, through its own example, information and advice to the larger community.

A 'CONSERVER SOCIETY' PROJECT is a potential medium

- * for focusing campus-wide attention on waste management, transportation, hazardous materials, air quality, water conservation, nutrition, natural habitat and other areas of concern
- * for encouraging individual and small group conservation initiatives within all faculties and departments
- * for initiating approaches, assessing methods and compiling information on conservation issues which may be useful to the general public

*Please fill out and return the following response coupon before
August 17 th:*

- ☐ YES, I support the 'CONSERVER SOCIETY' ethic
- ☐ YES, I see the need for A 'CONSERVER SOCIETY' PROJECT
- ☐ YES, I want further information about A 'CONSERVER SOCIETY' PROJECT
- ☐ YES, I will participate in A 'CONSERVER SOCIETY' PROJECT
- ☐ YES, I have some ideas for A 'CONSERVER SOCIETY' PROJECT
